

Work progresses with Webex. It's how millions do their best teamwork.

The Cisco Webex suite delivers complete collaboration from the cloud, connecting people and teams anytime, anywhere, in a secure environment. Whether you're having a quick discussion or working on a long-term project, Cisco Webex delivers tools for meetings, team collaboration, communication, and calling capabilities designed to optimize business productivity.

KEY FEATURES -----

Online meetings made simple

Join from any device, get HD quality audio and video, or share your screen. Anyone using Webex Teams can start a meeting. No more waiting on hosts to begin. No complicated URLs or codes to remember. No downloads or plug-ins required to join, and guests can join without an account.

Enterprise-grade security

Keep work safe with end-to-end encryption for messages, files, and whiteboard drawings shared in Webex Teams.

Inclusive collaboration

Use Webex from any device. Join meetings from any standards-based video device or even Microsoft Skype for Business.

Lock and moderation controls

Keep teamwork private by locking spaces. Only moderators can add people to a space. Spaces with members who are outside your company are marked.

KEY BENEFITS

Continuous collaboration

Collaborate with your team anytime, anywhere, via various audio, video, web, and video room systems. Anyone can be included in meetings, whether they are in the office, virtual, or an outside third party.

Make better decisions

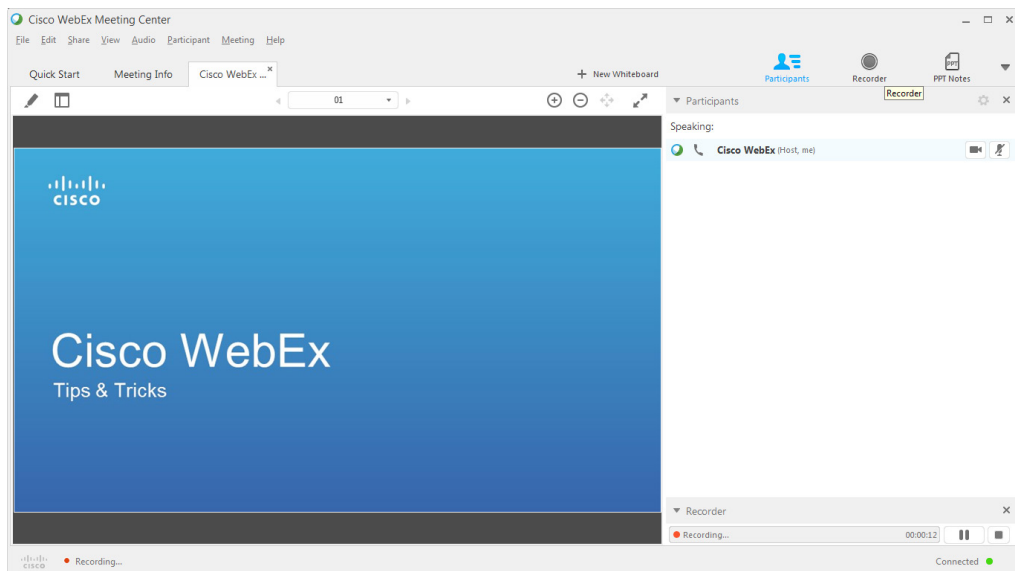

Work closely with your team in the office or remotely to share ideas that lead to making better decisions.

Never miss a message

Don't let time-sensitive emails get lost in an overflowing inbox. Instead, send secure group messages in Webex Teams.

Integrated experience

Integrated elements allow for a seamless experience across the platform. A user can transition from message to meeting and between devices for access on the go.
